EDUCATION

Trinity College of Engineering and Research, Pune, BE
Candidate of Computer Engineering

Expected May 2028

Phalke Patil College of Engineering, Karjat,
Junior College

April 2024

SUMMARY

Computer Engineering student passionate about solving real-world problems using AI, ML, and IoT. Built an IoT-based smart home automation system applications. Strong interest in problem-solving, system design, and developing impactful, scalable solutions through hands-on projects and hackathons.

PROJECTS

Personal Finance & Budget Tracker

Jan2025-Apr2025

- **Technologies:** HTML5, CSS3, JavaScript (ES6+), LocalStorage API
- **Description:** Developed a responsive web application designed to help users monitor financial health through real-time tracking of income and expenditures.
- **Dynamic Data Management:** Implemented logic to calculate and display total balance, income, and expenses dynamically as users add or remove transactions.
- **Persistent Storage:** Utilized the **LocalStorage API** to ensure user data is saved locally in the browser, allowing for data retention across sessions without a backend database.
- **Interactive UI/UX:** Created a clean, minimalist interface with a focus on ease of use, featuring transaction history logs and color-coded financial indicators.
- **Validation Logic:** Built-in form validation to ensure accurate data entry for transaction amounts and categories.
- **Website :** <https://tejaskhanavte.github.io/budget-tracker/>

Online Examination & Certificate System

May 2025-Aug 2025

Web-Based Application

- Developed an end-to-one digital platform to automate the examination process, from secure assessment delivery to instant credentialing.
- **Automated Assessment Logic:** Developed a dynamic quiz engine that handles multiple question types and performs real-time score calculation upon submission.
- **Dynamic Certificate Generation:** Integrated a backend/client-side library to **automatically generate and issue personalized PDF certificates** for users who achieve the passing criteria.
- **Database Management:** Structured a relational database to securely store user credentials, exam questions, and historical performance records.
- **Secure User Workflow:** Implemented session management and validation to ensure exam integrity and prevent unauthorized certificate access.
- **Technologies:** HTML5, CSS3, JavaScript (ES6+), PHP, MySQL
- **Website :** <https://tejaskhanavte.github.io/hackathon/>

All-in-One PDF Assistant

Web-Based Tool for PDF Management and Processing

Nov 2024 – Jan 2025

- Developed web tool for PDF merge, split, and conversion using HTML, CSS, Javascript
- Built user-friendly interface for document handling
- Focused on fast and efficient processing
- **Website :** <https://toolwebsite455.blogspot.com/>

AWARDS

Mini Project Competition:
Trinity College of Engineering and Research
Secured 3rd position in college-level mini project competition

Dec2024-Dec2024

CERTIFICATES

Introduction to cybersecurity

offered by Networking Academy
through the Cisco Networking
Academy program.

cyber job simulation

offered by Deloitte to
completed practical ta-
Sks in cyber security

cyber security expert

offered by Tech mahindra
foundation participated in
the online skilling course

Skills

Language: C,C++,Java,python, html,css javascript

Computer Science Fundamentals: Data Structure,oop,operating system,dbms

Technologies: IOT ,Arduino,Science integration
